

Action plan submitted by ÖZDEN DUMANLI for AŞKALE BORSA İSTANBUL ANADOLU LİSESİ - 30.01.2023 @ 22:14:42

By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.

Infrastructure

Technical security

- › Your school system is protected by a firewall. Ensure that the provision and management of the firewall are regularly reviewed and updated, as and when required.

Pupil and staff access to technology

- › It is great that in your school laptops/tablets are easily accessible within a lesson. Using them provides best practise for pupils in dealing with new media. Ensure that safety issues are also discussed.
- › There are clear advantages for staff and pupils to bring their personal devices to school and to access internet on them. Besides supplementing the technical equipment available at school, this provides an important link between learning at home and at school and an opportunity to guide young people in responsible use. However, staff and pupil use of their own equipment on the school network needs to be addressed in an Acceptable Use Policy so that users are clear about which networks they should use and why. The Acceptable Use Policy needs to include clear guidance about which activities are permitted while on the school network, and what is not allowed.

Data protection

- › You have a good policy of keeping your learning and administration environments separate. It is good to ensure that staff training on managing these environments is up to date as you continue to review your policies. Share your policy with other eSafety Label users by uploading it to your school profile.
- › There is a retention plan in place for your school detailing how specific school records are stored, archived and disposed. This is very good. Ensure that the plan is followed and review it regularly to ensure it relates to the Data Protection Act and other relevant legislation. Check the according fact sheet for more information.
- › It is good that all users are attributed a different password by the system in your school. Remind all school members never to write their given password down anywhere, certainly not on a sticker on a computer! Also, ensure that the Acceptable Use Policy reminds staff and pupils to keep their passwords secure and not share them with others.

- › It is good that your school provides materials on the importance of protecting devices, especially portable ones. Ensure that staff are aware of these and use them. This material should be pointed out to new staff as part of their induction. Please consider uploading those as evidence at [evidence](#) and sharing with others in the forum. Also ensure that your materials are regularly reviewed to ensure they are in line with the state of the latest technology.

Software licensing

- › It is good practise that the member of staff responsible is fully aware of installed software and their license status.
- › Ensure that all staff are aware of the procedure for purchasing new software and that all licenses are appropriate for the number of pupils and staff that will be using them. The [End-user license agreement](#) section in Wikipedia will provide useful information for understanding terms and conditions and comparing software agreements.

IT Management

- › There is a mechanism set up in your school that allows any staff member to make a request for new hardware/software - a request that leads to an informed decision within a reasonable amount of time. This is great as this way teacher can benefit from new technologies while still staying inline with school policy.

Policy

Acceptable Use Policy (AUP)

- › It is good practise that whenever changes are put into place in your school, the school policies are revised if needed. Note though, that also changes outside the school can affect policies such as new legislations or changing technologies. Therefore please review your policies at least annually.
- › It is excellent that eSafety is an integral part of several school policies. Do all staff make reference to it when appropriate through their teaching? Look for examples of good practice and share these with staff and pupils. Produce a short case study to highlight this good practice and upload it to your profile on the eSafety Label portal via your [My school area](#) as inspiration for other schools.
- › It is good that you have an Acceptable Use Policy for all members of the school community. Regularly review the AUP to ensure that it is still fit for purpose; to ensure that your AUP is sufficiently comprehensive, take a look at the fact sheet and check list on Acceptable Use Policy at www.esafetylevel.eu/group/community/acceptable-use-policy-aup-.

Reporting and Incident-Handling

- › Online issues that take place outside of school will inevitably have an impact inside school. Consider whether the school needs to make a statement about how such issues will be dealt with in the School Policy and the Acceptable Use Policy. Don't forget to anonymously document incidents on the Incident handling form (www.esafetylevel.eu/group/teacher/incident-handling), as this enables schools to share and learn from each other's strategies.

- › Have teachers received training on dealing with potentially illegal material? Is the procedure clearly indicated in the School Policy and the Acceptable Use Policy which all teachers and pupils have signed? All staff and pupils should be aware that they should report any suspected illegal content to the national INHOPE hotline (www.inhope.org).
- › Ensure that all staff, including new members of staff, are aware of the guidelines concerning what to do if inappropriate or illegal material is discovered on a school machine. Ensure, too, that the policy is rigorously enforced. A member of the school's senior leadership team should monitor this.
- › Please share the materials in which you tackle these issues especially with pupils and parents in the of the eSafety Label portal.

Staff policy

- › You have guidelines in your Acceptable Use Policy (AUP) on teachers' classroom usage of mobile phones. Upload your AUP to your school profile as it is a model of good practice that can help other eSafety Label schools.

Pupil practice/behaviour

- › It is good that pupils have the possibility to shape school activities when discussing eSafety, be it extra-curricular and curricular ones, based on what is going on in their daily lives. This way they will be more engaged and it also allows the teacher to recognise real life issues.
- › Your school has a school wide approach of positive and negative consequences for pupil behaviour. This is good practice, please share your policy via the [My school area](#) of the eSafety portal so that other schools can learn from it.

School presence online

Practice

Management of eSafety

- › It is good that you have a designated member of staff responsible for eSafety. Consider whether it would be helpful to have an eSafety committee comprising members from all groups of stakeholders. Ensure that this person is involved in the development and regular review of your School Policy. She or he should not only be informed, but should also fill out the Incident handling form whenever an incident arises at www.esafetylabel.eu/group/teacher/incident-handling.

eSafety in the curriculum

- › It is good that these issues have been included in the eSafety curriculum. It is a good idea to regularly review the issues which are being covered by your eSafety education in order to ensure that new and emerging issues are covered.
- › It is good that you are making a specific reference to sexting within your child protection policy as this is a

growing issue that many young people are having to deal with. It is also important to ensure that you are providing appropriate education for pupils about this issue.

- › It is good that eSafety is taught as part of the curriculum in your school. Ensure that all staff are delivering eSafety education where appropriate throughout the curriculum and not just through ICT or Personal Social and Health lessons. You/your staff may find some useful ideas and resources in the fact sheet Embedding eSafety in the curriculum at www.esafetylabel.eu/group/community/embedding-online-safety-in-curriculum.
- › It is good practise that in your school Cyberbullying is discussed in the curriculum with pupils from a young age.

Extra curricular activities

- › Try to develop further the engagement of pupils in peer mentoring and provide them with more opportunities to share their thoughts and understanding with their peers. Also check out the resource section of the eSafety Label portal to get further ideas and resources.

Sources of support

- › Ask parents for feedback on the kind of eSafety support which is being provided for them and consider innovative ways to maximise the number of parents who are benefitting from, and accessing it. See the fact sheet Information for parents at www.esafetylabel.eu/group/community/information-for-parents to find resources that could be circulated to parents and ideas for parent evenings.
- › There is a school counselor in your school though not trained on eSafety issues. Investigate if there is a training course that this teacher could follow in order to be better equipped to help pupils dealing with issues related to new media.
- › All staff should have some responsibility for eSafety. School counsellors, nurses, etc. are all well placed to provide advice and guidance on these issues and should be invited to contribute to developing and regularly reviewing your School Policy. Make the maximum use of their knowledge and skills and consider whether it is appropriate to provide training for them.

Staff training

- › In your school knowledge exchange between staff members is encouraged. This is beneficiary to the whole school. Upload PowerPoints, documents or similar of knowledge exchanges on eSafety topics via the uploading evidence tool, accessible also via the [My school area](#).

The Assessment Form you submitted is generated from a large pool of questions. It is also useful for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can upload evidence of such changes via the [Upload evidence on the My school area](#) section of the eSafety Portal. Remember, the completion of the Assessment Form is just one part of the Accreditation Process, because the upload of evidence, your exchanges with others via the [Forum](#), and your [reporting of incidents](#) on the template provided are all also taken into account.
